

Secure On-Premises Estonian-Language AI Solution for Transcription and Text Processing

The illustration was created using artificial intelligence

The aim of the project is to test and pilot an in-house AI-based solution for processing restricted-access data and to assess its suitability for supporting the collection, processing and use of diplomatic information in real-life workflows.

Project duration: 2026–2027

The project is funded by the Public Sector Innovation Fund.

Project contact at the Government Office: Eneli Saabas

Project Manager at the Ministry of Foreign Affairs: Riho Lodi, riho.lodi@mfa.ee
